Modul 1

The screenshot shows the 'General' configuration page for a new SAP HANA instance in SAP HANA Cloud Central. The page is part of a multi-step wizard with steps: 1. Type, 2. General (active), 3. SAP HANA Database, 4. SAP HANA Database Availability Zone and..., 5. SAP HANA Database Adv... (Optional), and 6. Data Lake. The 'General' section includes fields for Organization (8493b3d3trial), Space (dev), Instance Name (with a warning that it cannot be changed after creation), Administrator (DBADMIN), Administrator Password (with a 'Show password' checkbox), Confirm Administrator Password, and a Version dropdown set to 2023.28 (QRC 3/2023). A right-hand panel shows resource allocation: 30 GB SAP HANA Database In-memory and 120 GB SAP HANA Database Disk. At the bottom, there are 'Create Now', 'Previous', 'Next Step', and 'Cancel' buttons.

Membuat Instance Baru

The screenshot shows the 'SAP HANA Database' configuration page in the same wizard. It displays a warning about fixed storage size and type. The 'Memory' field is set to 30 GB, 'Storage' is 120 GB, and 'Compute' is 2 vCPUs. The right-hand panel shows the same resource allocation as the previous page. The 'Next Step' button is highlighted in blue.
